CONSORTIUM

EBRAHIM QASSIM

GROUP CHAIRMAN

Amir Suriya

Chief Executive Officer

OUR VISION

To attain inter-continental recognition by acing our global customer's and stakeholder's expectations through continuous value addition.

OUR MISSION

To serve our customers, society and nation by offering state-of-the-art textile solutions through our cutting-edge technology and innovative techniques keeping Social and ecological values intact.

OUR CORE VALUES

INNOVATION:

We constantly innovate the processes through which we deliver.

ENVIRONMENT FRIENDLY:

We aspire to create a sustainable environment that leads to a better life.

CLIENT FIRST:

Clients/Customers are always our first priority.

OWNERSHIP:

We own our Vision & remain committed to delivering what we promise.

SIZING & WARPING DEPARTMENT

With in-house facility of high speed, state-of-the-art, German brand- KARL MAYER PROSIZE sizing & warping plant, NTM ensures the reproducibility from the looms.

High quality sizing chemicals are used keeping closely intact the sustainability of ecological and commercial factors.

WEAVING DEPARTMENT

Core strength of NTM is its state of art weaving plant to construct all ranges & varieties of quality fabrics & terry for our valuable commercial & export customers.

Our weaving section is equipped with high speed 132 PICANOL Air-jet looms running at speed of 650-900+ RPM attaining 90%+ efficiency to produce Fabrics & Terry in Plain, Dobby & Jacquard weave structures.

To fulfill NTM's order requirements our sister concern ZAMAN TEXTILE MILLS (pvt) Ltd is also our contractual partner with latest high speed looms.

Following its mission NTM is on a move to expand its weaving facilities with induction of modern Shuttle-less and water jet looms to cater the local and foreign requirements.

WEAVING DEPARTMENT (FABRICS)

112 Looms in width 250cm, 280cm, 340cm and 360 cm are assigned to weave Plain, Lawn, Sateen, Percale, Sheeting, Panama, Duck, Twill, Dobby qualities with annual production of 17 million plus meters.

TOTAL	12

For Terry Jacquard 04 Jumbo looms in 260 cm width are available with 4, 6 or 8 colors arrangements & 6144 hooks.

WET PROCESSING DEPARTMENT

To bring the greige towel and fabric life with brilliance and uniqueness, NTM is on a verge of expanding its processing plant with the induction of latest bleaching, dyeing/printing and finishing set-ups.

Yarn Dyeing, Continuous & Semi-continuous & exhaust dyeing set-ups, Rotary, Flat-bed & Digital Printing machines and finishing plant is being incurred to cater the export & local requirements.

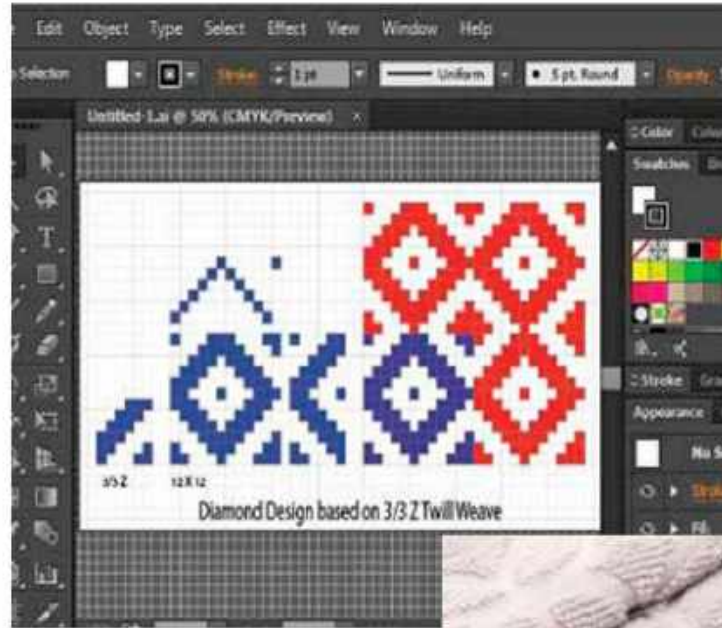

Meanwhile, processing requirements are being fulfilled at our sister concern Zaman Textile Mills on contractual basis.

NTM's CAD-CAM equipped designing department is its integral part and is directly integrated with Terry & Woven Jacquard looms to translate the designers' imaginations and customer's illustrations onto towels & fabrics.

Our best in town textile and graphic designers are practicing the modern designing software to communicate the concept of regular & seasonal designs to the individual customers and vice versa.

NTM's greige, white, dyed & printed fabrics in Cotton, Polyester & their blends with Viscose & Spandex are Oeko-Tex 100 certified.

NTM's white, dyed & printed home textiles, terry & bathrobes in Cotton & Polyester and their blends with Viscose & Spandex are Oeko-Tex 100 certified.

QUALITY CONTROL & ASSURANCE DEPARTMENT

NTM's Quality Control Department diligently monitors and rigorously ensures the implementation of SOPs and guidelines designed to produce prime quality products for our valuable business partners.

Quality control inspectors in NTM act as 'POLICE' to conduct inspections on AQL basis right from the initial stage of sourcing raw materials, in-line processes, till final finished textiles.

The Quality Control Department is also responsible for the proper maintenance of all production machinery and installation vehicles. Lean, 6 σ (six-sigma) and 100% inspection methodologies are implemented by Quality Control & Assurance departments at NTM for optimizing the people, resources, effort, and energy of our organization toward creating value for the customer.

Aftermaths of WWI left Japan's economy shattered with badly damaged infrastructure, limited capabilities, and a government in turmoil. But in a short span of time, the reputation of Japan's products moved from "plastic, knick-knack, junk" to "quality, state-of-the-art, reliable", owing the W. Edwards Deming's statistical quality practices.

If Japan can do, why cant we?

NTM has designed its QMS based on the 14 golden rules of Mr. Deming's policy:

- ❖ Constancy of purpose towards improvement
- ❖ Adaptation of new philosophy
- ❖ Stop depending on inspections
- ❖ Use a single supplier for any one item.
- ❖ Improve constantly and forever
- ❖ Use training on the job
- ❖ Implement leadership
- ❖ Eliminate fear
- ❖ Break down barriers between departments
- ❖ Eliminate management by objectives
- ❖ Remove barriers to pride of workmanship
- ❖ Implement education and self-improvement
- ❖ Make "transformation" everyone's job
