Textile Fibers

TENCEL THE NEW AGE FIBER

TENCEL fabric is an eco-friendly material derived from renewable wood sources. Its advantages include softness, breathability, moisture management, and antibacterial properties. It's also biodegradable, versatile, dye-friendly, and durable, making it a sustainable and comfortable choice for various applications.

MODAL & PRO-MODAL FIBER

Lenzing Modal and ProModal are premium fibers made from beech wood pulp. Lenzing Modal is soft, breathable, and eco-friendly, while ProModal enhances durability. Both are produced sustainably and used in apparel and bedding for comfort and eco-consciousness.

LINEN FIBER

Linen is a natural fiber derived from flax plants, known for its exceptional breathability, durability, and hypoallergenic properties. It has a natural luster, making it suitable for clothing and home textiles. Linen's sustainable production and timeless aesthetic contribute to its popularity in various applications, from apparel to industrial uses.
